## Patriotic Fund.

Malch has the distinction of being first in the district to launch a campaign.

Throughout the province meetings are being held and committees formed to commence such a fresh campaign on behalf of the Patriotic Fund. The Bow Island district, as yet, has done but little. The late throwing no doubt being largely responsible. Signs, however, are not wanting now to indicate that this matter is engaging the serious attention of some of our official bodies.

Malch, which did so well last year, is again to the fore, and as a preliminary to raising another substantial amount, a meeting will be held on Sunday afternoon next, November 12th, at 1:30 p.m., to arrange the committee and organize a campaign. It is understood the Reeves and Councilors of the Municipality are interesting themselves actively, and as a result it is fully believed that the amount raised in 1915-16, splendid as it was, will be more than equalled in the new campaign. It is proposed to have a drive at Malch, to include its operations to townships 80 and 810.

Messrs. Huckle, Stewart and Tweed of Medicine Hat autored to Malch the first of the week, but found everyone too busy with the throwing, consequently no organizing was attempted. They, however, were pleasantly surprised on being informed that over \$700 had been already raised in the vicinity of the Patriotic Fund. Where Malch leads others can very well follow.

## Passed Worthless Cheque.

Frank Anderson of Foremost, formerly of Dalm, a Norwegian, was charged on Monday before Justice Brown and Bell with having passed a worthless cheque on T. A. Gillis of Foremost, and with obtaining money under false pretences.

Accused was arrested in Bow Island by Chief Bruce on information supplied by Gillis of Foremost. He pleaded guilty to the charge and elected to be tried locally, and was sentenced to three months at Lethbridge.

Ford Campbell of Bow Island was also charged on the same day with being drunk and disorderly. He was charged on Monday before Justice Brown and Bell with having passed a worthless cheque on T. A. Gillis of Foremost, and with obtaining money under false pretences.

Owing to previous convictions against him, Justice Brown now sentenced him to 30 days at Lethbridge without the option of a fine.

## President Wilson Re-elected.

New York, Nov. 9.—President Wilson has carried California and been re-elected.

Fifty hours after the polls closed in California Republican State Chairman Rowell conceded the state to the president. Thus the 13 votes needed to assure the president a majority in the electoral college dropped into the Democratic column, and apparently ended the suspense and anxiety of an election which has been unparalleled in American political history.

## Municipal Elections.

Rumors of Dark Horses.—A Contest not Unlikely.

This year there will be three, and possibly four, vacancies to fill on the Town Council. Who are the likely candidates? Several names have been mentioned in connection and it is likely that the day of nomination will reveal a few surprises. One thing is almost certain. There will not be the indifference of last year, and the candidates who are nominated will probably have to get out and hustle as never before. Of those retiring two or possibly three will run again, of which more anon, and these may be three or four names of other nomination. The matter of a contest, however, should not be discouraging. Quite the contrary. It indicates an awakening on the part of the citizens in municipal affairs, and this is a healthy sign.

To be eligible for election as a Councilor a person must be a British subject, of the full age of 21 years, able to read and write the English language (a matter some of our councilors accuse the others of not being able to do), is resident within the town or within two miles of the limits of the town, and is the owner at the time of nomination of a freehold estate within the town of the value of \$100 over and above all charges, liens and encumbrances, and whose name is on the last revised assessment roll.

Persons qualified to vote at elections shall be of the full age of 21 years, and whose names appear upon the last revised voters' lists of the town.

Bockeye Pack Was Much Less Than in Previous Two Years

The B. C. Bockeye pack is 731,000 cases, as compared with 472,000 cases last year, revealing a condition that does not make the packers optimistic. It is said to be a bad year, and this was due to the fact that weather conditions through the whole season were wet and cold, causing fish to swim low in the water and thus escape the 22lb. net. The fish were in the rivers and lakes, but they were not caught on their way up to the spawning grounds.

It was an "off" year for sockeyes on the Fraser River, but the falling off was greater than had been expected even for a slim year. One packer contracted to sell 15,000 cases before the season began, but all he could put up was 4,000 cases, and he was hard put to get even this. In general, contracts are being filled up, and the fishermen are glad to take what they can get.

## Huge Arms Output

Italy Now Has Adequate Supply of Munitions From Its Own Plants

The enormous progress that the manufacture of munitions in Italy is making was revealed for the first time by Premier Bonelli in a recent speech. Notwithstanding her poverty in iron, Italy has now made it possible to manufacture munitions not only for herself, but to supply her allies. Her 1900 military establishment, consisting of the first class gipsy and 800 "Ansaldo" factories, produces annually by 425,000 hands, of whom 45,000 are women, for the present year, Italy is now making as many guns in a month as she made in a year formerly. Her machine-gun output has multiplied six hundred times, and that of shells one hundred and ten times. Her automobile output also has increased, while the aviation industry is making rapid strides.

The biggest lemon ever raised in California grew at Sawtelle and measured 15-12 inches in circumference one way and 19-12 inches the other, weighing nearly three pounds.

## Marquis Wheat

Is Worth More Than Experimental Farms Total Cost, Says Expert  
The "Marquis variety of wheat is worth more to the Canadian experimental farms than all the other varieties," said C. H. Newman, secretary of the Canadian Seed Growers' association, after his return from an extensive tour of the prairie provinces. "It is hard to compile its value. Although it was only first distributed about five years ago, it is now the most popular wheat in Western Canada, and probably seventy per cent of this year's crop was the Marquis strain. I think it is safe to say that if the Red Fife wheat had been grown all over the country, the Marquis had not been produced, we would this year have a crop of fifty million bushels less, which at prevailing prices would have meant a loss to the country of from five to ten million dollars."

It should be added that it was Marquis wheat which won the \$1,000 prize at the New York Land Show in 1911, for the best milling wheat grown anywhere in the two Americas, and which also won the grand sweepstakes prize for hard wheat at the International Dry Farming Congress in 1914 and 1915.

No Compromise Possible  
Compromise is impossible with such weapons military system as the Marquis wheat, which is the only one of its kind in the world. It is the only one of its kind in the world. It is the only one of its kind in the world. It is the only one of its kind in the world.

## The Old-Fashioned Hymns

Old Hymns Sound Sweeter Than the Modern Compositions

An old Tennessee card got up in a mass meeting of negroes attending the national "baile" convention in Kansas City the other night, called for the hymns to be sung in the old time hymn like it ought to be sung, and then showed them how to sing.

"Dat ain't de way many used to sing it down de de country," he declared, interrupting the chorists. "A modern composition, 'Annie's' shouted the older members of the congregation, and then in a little while he had them all singing the old hymn in a way that would take you plums to glory."

We didn't lose the singing, of course, but we heard some modern hymns, and also we remember how in the days of our forefathers even white folks used to sing the old hymns. So we can imagine how it all happened. We are quite sure had we been there we should have added our "Amen!" to those of the congregation.

We wouldn't say a word against modern hymns and modern hymnists. But we can remember a time when the old hymns were sung, and such hymns, when folks used to sing like they had religion sure enough. They didn't put the trills and quavers of the modern singers in their singing, and they didn't sing the old hymns didn't sound so much like a cross between an opera and an old country hymn as they do now.

## A BRONCHIAL COUGH

Is wearing and dangerous because the inflamed, mucus-filled tubes interfere with breathing and the fresh air passes through that unhealthy tissue.

Probably no other remedy affords such prompt and permanent relief as Scott's Emulsion. It checks the cough, loosens the lining of the throat and bronchial tubes and strengthens the lungs to avert tuberculosis. This point cannot be emphasized too strongly. Emulsion has been suppressing bronchitis for forty years and will help you.

Be careful to avoid substitutes and insist on SCOTT'S. AT ANY DRUG STORE.

## Germany's Crimes in Africa

Enemy Officers Order Atrocities, Saying Colonial War Is Unconvinced

Not only does the Hun practice his policy of blood, indiscriminate mutilation of the wounded, the infliction of awful crimes upon the helpless women and children in territory, but he is also guilty of the most heinous crimes in his own territory. He is guilty of the most heinous crimes in his own territory. He is guilty of the most heinous crimes in his own territory.

This remarkable statement was made by a senior German officer in the Kameruns to a British officer. It is pointed in a later book published recently, describing such an astonishing number of German atrocities and breaches of the rules of war as make it impossible even to repeat them. It is pointed in a later book published recently, describing such an astonishing number of German atrocities and breaches of the rules of war as make it impossible even to repeat them.

The papers include a series of official reports from October, 1914, dealing generally with German cruelty shown to the native inhabitants of the Kameruns and East Africa. These reports are given in German, and translated into English. They are given in German, and translated into English. They are given in German, and translated into English.

Major-General Duffell, reporting to the British on Jan. 28, from the Kameruns, says that the Germans adopted a systematic policy of extreme brutality towards the natives who they considered inferior to the white race. He says that the natives were tortured, and afraid to give information of their movements.

First Gent: Never mind, bring him with you.

A local Territorial was placed on guard for the first time. About midnight he observed a shadowy form approaching from the distance, puffing his duty, he immediately presented his arms. "Halt! Who goes there?"

A somewhat happy voice replied: "It's I. I'm going to see Hamlet." Current Opinion.

**Notes by the Way**

By "MINIMUS"

Far be it from one who writes under such a modest pen name as "Minimus" to offer advice to such high fliers in the journalistic world as to take to themselves the noble, and in writing title of *Eye Opener*. We look up to them with awe and reverence. Far be it from us to make odious comparisons, and refer to a gentleman in Holy Writ who wished also to be an *Eye Opener*. You will remember that this individual was first advised to remove a tolerably large piece of wood from one of his eyes, that he might more clearly see his way to open the eyes of his friend. But No!

Go on opening eyes with all means. But, for heaven's sake open none. We have two, most of us. One to see the right things and why they are right. And the other to see the wrong things and why they are wrong. Opening this latter eye is a very easy job. It is very very easy to see the wrong things and quite simple to see why they are wrong. Really the eyes that see these wrong and bad things is quite efficient. The eye that sees the good and the pure is at fault. Open this other eye for us, please?

Science and Christianity quarrel on this point. Science says Religion is not necessary for morality. Science itself promotes morality. It does. It promotes morality as the bagman's rips does,—by fear. It shows the evil physical consequences of breaking the laws of God and then says "Look at that!" The semi-scientific moral does this. "Zola's Drink" does it. "Zola's Drink" does it. They show as the bad results. They wake us moral by fear. They open our eyes for us.

As has been lately pointed out, the Christian poet Dante gives us three Visions—Heaven, Purgatory and Hell. These novels and scientific writings give us one Vision—Hell. We want the other eye opening. We want to be able to see Heaven, the good, the noble, the pure. A man may keep

himself straight and clean by thinking always about disease. Or he may do it by always thinking about St. Michael. You may dispute which way is the more reasonable. You cannot dispute which method is the more wholesome.

A recent scientific writer—Forster, has found this out. He says now he was once a Socialist and an Atheist that the Catholic Church knows more about character making from the physiological viewpoint than scientists are ever likely to forget. He says that Religion is at any rate two-eyed.

The one-eyed man who is ever seeing the bad is always a miserable creature. A one-eyed journalist would be the same. We have always to remember that, whatever some men may say, man is a false creature. Dish up to him unvarnished stuff and he will read it. More, he will pay for it. And more yet, he will submit to being led through life with a bandage over one eye if his head is not clear on these things.

And more yet, he will submit to being led through life with a bandage over one eye if his head is not clear on these things.

**Claim Liquor Act Ultra Vires.**

Calgary, Nov. 6.—Whether the Liquor Act is ultra vires otherwise will be known in a few days. An appeal, making this as the chief matter in dispute, was varied direct to the appellate division of the Supreme Court this morning. The appeal is from the conviction registered in the case of Rex vs. Covert by the magistrate. J. R. Varley is acting for the appellant and claims that the act is ultra vires under the decision of the Supreme Court of Canada in 1912 in which it was held that a conviction under the temperance act of Nova Scotia constituted a crime under the criminal code of Canada, on the ground that the procedure of the punishment was provided for by the act. There are other arguments advanced but this is the chief one as the final court of the Dominion is quoted as authority. The contention is that the province of Alberta has usurped the right to enact criminal legislation which is the exclusive right of the Dominion of Canada.

**Rights of Farmers**

To Slaughter Animals and Peddle Meat.

A report is going the rounds in some districts that farmers not holding butcher's licenses are prohibited from slaughtering their animals and peddling the meat; and Section 136 of the amendments to the Stock Inspection Act, 1916, is quoted as the authority. This section reads as follows:—

"136. It shall not be lawful to offer beef for sale in any city or town in the province by other than a licensed butcher unless the hide taken from the carcass from which such beef was obtained and each quarter of such carcass have been inspected by an inspector of stock or a brand reader, and such hide and each quarter have been stamped by the stock inspector or brand reader with an official stamp authorized by the Minister."

The section refers to the sale of "beef" only, so that it is clear that the Act does not apply to the sale of mutton or pork by any person at any place. As to the sale of beef it applies only when it is sold in an incorporated city or town. Presumably the restriction was put on to prevent beef from stolen animals being sold in

**Does Advertising Pay?**

Irascible have compiled statistics that prove that 84 per cent. of the failures are among the non-advertisers. The merchant who does not believe in the use of printer's ink has never advertised right. The failure to produce results is not chargeable against advertising, but against the manner in which it is done. Advertising is the modern creative force, positive and potent—a force that has produced two kinds of grass where but one has grown before. It is the flowering of industrial evolution. It is the promoter of right dealing—the solution of the mail order problem. Its basic principle is frankness.

## Our Prices Must be Right.

At a recent auction sale our har-  
ness brought higher prices than we  
ask in the Store.

We keep prices down, in spite of the  
constant increase in the price of  
leather and trimmings.  
When you want a Harness, come in  
and see us. We'll use you right.

announcing that his father  
was dangerously ill and not ex-  
pected to recover.

D. Needham is here this week  
and is disposing of some of his  
real estate at very attractive  
prices. Numerous inquiries  
made of him indicate a lively  
interest on the part of the resi-  
dents of this district in Bow Is-  
land, and Mr. Needham believes  
from what has been told him  
that a great number of the  
farmers will eventually build a  
home in the town.

Bob Howard, previous to his  
departure from the district, is  
going to dispose of the whole  
of his horses, cattle, etc., by  
public auction. The sale will
